WORK EXPERIENCE

Product Designer

Toronto, Canada

Arctic Leaf Inc.

Nov 2021 - July 2024

- Collaborated with cross-functional teams, engineers, product managers, and designers to build scalable software solutions that balanced performance, usability, and business impact.
- Participated in discussions on system architecture and scalability, contributing to full-stack solutions and ensuring seamless integration across product areas.
- Partnered with developers to implement clean, maintainable code using React, JavaScript, and modern development best practices, with a focus on accessibility and performance optimization.
- Built modular, reusable UI components and contributed to shared design systems, streamlining development across multiple teams.
- Used analytics tools such as Hotjar to uncover user behavior insights and helped guide data-informed improvements to product features.
- Provided technical input throughout product development cycles, strengthening team collaboration and improving handoff workflows.
- Maintained a user-centered mindset while contributing to products that were both technically sound and highly functional at scale.

Design Research Intern

Toronto, Canada

Uchu Dev May 2021 - July 2021

May 2021 - July 2021

- Led design research initiatives, including user interviews and usability testing, to optimize design layouts and enhance the overall user experience.
- Collected and analyzed data from live user sessions and internal stakeholder feedback, addressing complex topics to inform design decisions and improve product functionality.
- Synthesized research findings and delivered actionable insights to stakeholders, driving informed decision-making and aligning design strategies with business goals.

PROJECTS

Google Technology 1st Place Winner - Social Impact Hackathon

San Francisco, California

AI Integration, React Native, Typescript, Bun, Node.js and SCSS

Nov 2025

- Developed an AI-powered full-stack application to streamline access to homeless shelter resources for at-risk youth.
- Leveraged AI to make automated phone calls to shelters, check bed availability, and pre-fill intake forms for users.
- Designed empathetic, user-centered intake workflows to reduce friction and improve access to social services.

Microsoft Hackathon

Toronto, Canada

AI Integration, React, JavaScript, Node.js, and CSS

Feb 2026

- Collaborated with fellow developers in a Microsoft-sponsored hackathon to design a solution that encourages user adoption of AI tools.
- Integrated the Microsoft Copilot API to generate AI-driven email responses, enhancing user productivity and showcasing AI's efficiency.
- Highlights time saved through AI-generated responses, demonstrating a reduction in average email drafting time.

EDUCATION & CERTIFICATIONS

University of Toronto

Toronto, Canada

AWS Certified Cloud Practitioner

Amazon Web Services

SKILLS

React, JavaScript, Python, Java, SQL, Node.js, Express, GitHub, Cloud Services, Heroku, Vercel, Netlify, HTML, CSS, Figma, Design Thinking, Wireframing, User Research, UX Strategy, Personas, Prototyping, User Testing, UI Design
